

Empathize & Discover

Date	31 January 2025
Team ID	
Project Name	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	4 Marks

Empathy Map Canvas:

Create an empathy map to understand your customer's point of view. An empathy map is a simple, easy-to-understand visual tool that captures what a customer says, thinks, does, and feels. It helps teams better understand user behaviour, needs, goals, and challenges. By looking at the experience from the customer's perspective, you can design solutions that improve satisfaction and create a better food ordering experience.

Example:

Example: Food Ordering & Delivery Application
