

Project Design Phase
Problem – Solution Fit Template

Date	15 February 2025
Team ID	
Project Name	Food Ordering Behaviour and Consumer Trends Analysis Using Tableau
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The **Problem–Solution Fit** helps identify the challenges faced by online food delivery customers and ensures that the proposed solution effectively addresses those challenges. It enables project teams to understand customer ordering behaviour, identify consumer trends, and develop a Tableau-based analytics solution that improves business decisions, restaurant performance, and customer satisfaction.

Purpose

- ☐ Analyze customer food ordering behaviour and identify the key challenges faced by customers.
- ☐ Provide a data-driven solution using Tableau dashboards to support better business decisions.
- ☐ Improve communication and marketing strategies by understanding customer preferences, ordering patterns, and buying behaviour.
- ☐ Help restaurants and food delivery platforms enhance customer satisfaction by reducing delivery delays, improving service quality, and identifying popular food trends.
- ☐ Understand existing consumer trends and generate meaningful insights to improve restaurant performance, increase sales, and enhance the overall customer experience.
