

Project Design Phase
Proposed Solution Template

Date	4-07-2026
Team ID	
Project Name	Food Ordering Behaviour and Consumer Trends Analysis Using Tableau
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Customers face difficulty in choosing the best restaurant due to numerous options, inconsistent reviews, delivery delays, and unclear pricing. Businesses also struggle to understand customer preferences and ordering trends.
2	Idea / Solution Description	Develop a Tableau-based analytics solution that analyzes food ordering behaviour and consumer trends. The system visualizes sales, customer preferences, restaurant performance, delivery trends, and ordering patterns through interactive dashboards.
3	Novelty / Uniqueness	Provides interactive dashboards with real-time insights into customer behaviour, restaurant performance, peak ordering hours, and food preferences, enabling better business decisions through data visualization.
4	Social Impact / Customer Satisfaction	Helps customers make informed food choices while enabling restaurants to improve service quality, reduce delivery delays, and increase customer satisfaction based on consumer behaviour analysis.
5	Business Model (Revenue Model)	Restaurants and food delivery platforms can use the analytics dashboards to improve marketing strategies, optimize operations, increase sales, and enhance customer retention. Premium analytics reports can also generate revenue.
6	Scalability of the Solution	The solution can easily scale by integrating larger datasets, additional restaurants, multiple cities, real-time data sources, cloud databases, and advanced predictive analytics in the future.
